Section III. Hazards Identification.

POTENTIAL ACUTE HEALTH EFFECTS

This product may irritate eyes and skin upon contact due to mechanical action and drying action. Inhalation of dust may produce irritation to the gastro-intestinal or respiratory tract. Ingestion of excessive quantities of this substance may produce irritation of the gastro-intestinal tract, characterized by irritation, nausea, vomiting and diarrhea. Potassium chloride is rapidly excreted from the body in the absence of pre-existing kidney or circulatory system disfunction making acute toxic effects very rare. Potassium chloride is used as a salt substitute in human sodium reduced diets and as an animal nutrition supplement.

POTENTIAL CHRONIC HEALTH EFFECTS

There is no known effect from chronic exposure to this product in healthy individuals. The product is not carcinogenic, mutagenic or teratogenic. Individuals with existing kidney problems should minimize their exposure to this substance.

Potassium chloride is used as a dietary supplement in food for human consumption and is classed as being "generally recognized as safe" when used in accordance with good manufacturing practice. 21 CFR 182.5622

Section IV. First Aid Measures

EYE CONTACT

May cause irritation by mechanical action. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Obtain medical attention if irritation persists.

MINOR SKIN CONTACT

May cause skin irritation. Wash contaminated skin with soap and water. Cover dry or irritated skin with a good quality skin lotion. If irritation persists, seek medical attention.

EXTENSIVE SKIN CONTACT

No additional information.

MINOR INHALATION

Over-exposure by inhalation may cause respiratory irritation. Allow the person to rest in a well ventilated area. Loosen tight clothing around the neck and waist. Obtain medical attention if irritation persists.

SEVERE INHALATION

No additional information.

SLIGHT INGESTION

Low toxicity. Do not induce vomiting. May cause digestive tract irritation, with accompanying nausea, vomiting and diarrhea. If spontaneous vomiting does occur, lower the head so that the vomit will not reenter the mouth and throat. If tolerated, give no more than 1 cup of milk or water to rinse the mouth and throat, dilute the stomach contents, and minimize irritation. No more than 8 ounces (1 cup) in adults and 4 ounces (1/2 cup) in children is recommended to minimize the risk of vomiting. Obtain medical attention if irritation persists.

EXTENSIVE INGESTION

No additional information.

Section V. Fire and Explosion Data

Section VI. Accidental Release Measures

SMALL SPILL	Use appropriate tools to put spilled solid in a suitable container for intended use or disposal.
LARGE SPILL	Prevent additional discharge of material, if possible to do so without hazard. Prevent spills from entering sewers, watercourses, wells, etc. Recover and place material in suitable containers for recycle, reuse, or disposal. Ensure disposal complies with government requirements and local regulations.

Section VII. Handling and Storage

PRECAUTIONS	If user operations generate excessive dust, use ventilation to keep exposure to airborne contaminants below the exposure limit.
STORAGE	Contains moisture sensitive material; store in a dry place. Product will absorb moisture and will cake when dried.

Section VIII. Exposure Controls/Personal Protection

ENGINEERING CONTROLS	Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. If user operations generate dust use appropriate ventilation to keep exposure to airborne contaminants below the exposure limit.
PERSONAL PROTECTION	The selection of personal protective equipment varies depending upon conditions of use. As in all industrial areas, use safety glasses with side shields. Under well controlled conditions where exposures are below the occupational exposure limit, normal work clothing should suffice. However, appropriate protective clothing and respiratory protection must be available in the event of an emergency.
PERSONAL PROTECTION IN CASE OF LARGE RELEASE	Where significant skin and eye contact may occur as a result of prolonged or repeated exposures, wear long sleeved clothing, coveralls, leather gloves, and safety glasses with side shields. Use a filtering facepiece dust respirator if concentrations may exceed the occupational exposure limit. For U.S. work sites where respiratory protection is required, ensure that a respiratory protection meeting 29 CFR 1910.134 is in place.
EXPOSURE LIMITS
